PROFESSIONAL SUMMARY

Full-stack web developer with hands-on experience delivering WordPress and WooCommerce projects for international clients and building a production REST API application with Node.js, Express, MongoDB and JWT role-based authentication. Experienced in maintenance and technical support for live sites (multi-site, cPanel hosting, migrations). Works independently in remote, asynchronous environments: requirements, delivery and revisions, in English (B1, technical).

TECHNICAL SKILLS

- **Frontend:** JavaScript (ES6+), HTML5, CSS3, Bootstrap 5, Responsive Design, Vue.js (personal projects)
- **Backend and APIs:** Node.js, Express.js, REST APIs, JWT authentication, role-based access control, Bcrypt, Nodemailer
- **Databases:** MongoDB, Mongoose, MySQL, SQL
- **WordPress:** WordPress, WooCommerce, Kadence, Elementor, Advanced Custom Fields (ACF), custom MU plugins, SEO configuration, structured data (Schema)
- **Tools and Deployment:** Git, GitHub, Render, Vercel, cPanel/FTP, site migrations, VS Code, GitHub Copilot

PROFESSIONAL EXPERIENCE

WordPress Developer, Freelance (Remote) | Aug 2026 – Oct 2026

- Customized a live WordPress site: added a registration link inside the login popup using JavaScript and a custom MU plugin.
- Built a technical documentation section (/docs) with sidebar navigation, internal linking and reusable Kadence components.
- Audited SEO plugin settings, homepage configuration and structured data; validated results with Google Rich Results Test.
- Diagnosed and fixed WordPress and plugin configuration issues while preserving the existing site structure.

Web Developer, Freelance via Upwork (Remote) | 2025 – 2026

- Delivered a review website for an international client from scratch, including branding, visual identity and content structure.
- Built a real-time dynamic search and filter with JavaScript and ACF, allowing users to filter content without reloading the page.
- Handled requirements gathering, revisions and final delivery with a remote client entirely in English.

PROJECTS

School Management System, Full Stack | Apr 2026 – Present

Node.js, Express, MongoDB, Mongoose, Bootstrap 5, REST API, JWT, Bcrypt, Nodemailer

- Built a full-stack application in production with JWT authentication, Bcrypt password hashing and role-based access control (admin/guest) to manage users, schools, grades and learning materials.
- Designed a modular Express and Mongoose architecture with a responsive Bootstrap 5 interface, deployed on Render.

Radashop, WordPress Product Catalog (In Development) | Sep 2026 – Present

Astra Child Theme, Elementor Pro, ACF, Custom Post Types

- Planning a product catalog with custom post types and structured ACF content; designing site structure, navigation and visual system.

WooCommerce Technology Store | 2022

WordPress, WooCommerce, Astra, Elementor

- Built a fully operational online store with product catalog, events calendar and WhatsApp integration for customer support.

EDUCATION AND TRAINING

- Higher Technician in Software Development, Universidad Cenfotec, San José, Costa Rica | 2025 (Jan 2024 – May 2025, graduated with honors)
- Web Development Bootcamp, Alura ONE Next Education | 2023
- Higher Technician in Front-End Development, Instituto Nacional de Aprendizaje (INA), Guanacaste | 2022
- Cisco Python Essentials 1 • English for IT, Cisco / MICITT

LANGUAGES

- Spanish: Native
- English: B1, technical reading, documentation and client communication
